

XCESSIBLE LUBRICATOR

Automatic, Single-point, Grease System

Ceiling Fans and other hard-to-reach applications

This unit is a battery-operated, single-point grease system perfect for lubricating hard-to-reach bearing points. This unit is perfect for applications where the unit can be mounted next to the bearing. It's easy to install and a cost-effective solution for maintaining proper lubrication for single-point applications. Typically used for indoor applications but can be adapted for outdoor use.

Splash cap included (not shown above). Refill kits with lubrication canister and battery set available.

Technical Data

Availability	1 week
Typical Install Time	15 minutes
Number of Lube Points	1 bearing
Lubrication Intervals	Continuous
Recommended Lubes	JAX
Power Requirements	Lithium Battery
Air Requirements	None
Recommended Maintenance	Replace battery and grease every 22 weeks
